numbers you can trace

And the bid window does not move.

Fifteen pain points.

Fifteen symptoms. One cause — the chain breaks at every handover.

INFORMATION & DESIGN

01 Drawing and document versions

02 **Manual take-offs and BOQ**

04 Design changes and rework

08 Poor coordination between parties

10 Fragmented data, slow decisions

COMMERCIAL

03 **Slow estimation and tendering**

05 Change orders hard to manage

13 Budget overruns, weak cost control

12 No basis for forecast or risk

DELIVERY & OPERATIONS

06 Procurement and supply delays

07 Material wastage and stock

09 Manual progress reporting

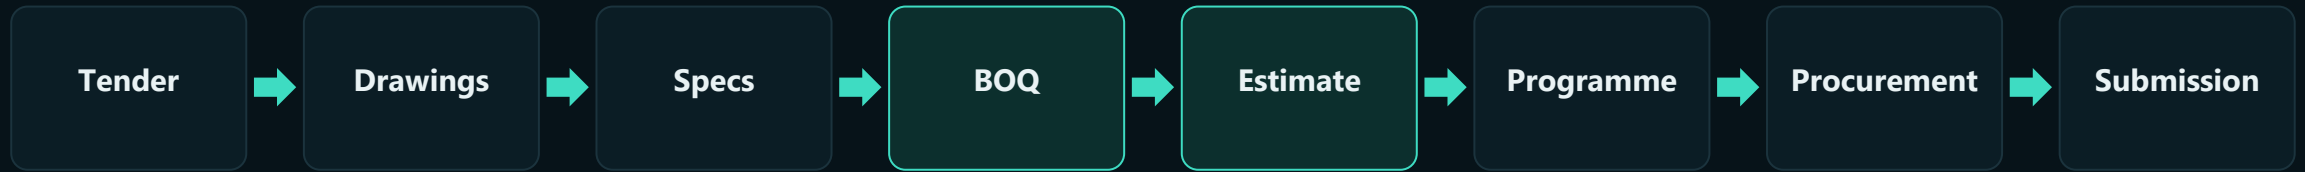

11 Many projects at once

14 Schedule overruns

15 **Planning measured in months**

Preckon					

The cost is in the joins.

Nothing is retyped between them.

Each stage reads what the last one confirmed.

It reads the tender.

ESTIMATOR DAYS PER BID

11 days back, on every bid.

The estimator stops measuring and starts judging — which is the part you were paying them for.

Fourteen advantages.

Weeks to hours. Months to days. And every number still names its source.

PRODUCE THE NUMBERS

01 **AI take-off and BOQ — weeks to hours**

02 Estimates and tenders in days

11 Higher accuracy, fewer errors

13 Planning: months to days

KEEP THEM TRUE

03 One source of truth, versioned

04 **A design change updates everything**

07 Live budget and variance control

08 AI forecasting and risk signals

RUN THE WORK

05 Integrated procurement and materials

06 Real-time dashboards

09 One platform for every party

10 Multi-project workspace

12 **End-to-end digital lifecycle**

14 Productivity and scale

Put your own numbers in.

INPUTS – REPLACE WITH YOURS

Bids per year	40
Estimator days per bid	15
Cost per estimator-day	\$600
Average contract value	\$8M
Win rate	20%

LEVER 1

\$264k

saved a year in estimating effort
440 estimator-days returned

LEVER 2

+10

more bids a year with the same team
≈ 2 extra wins at a 20% rate

LEVER 3

\$80k

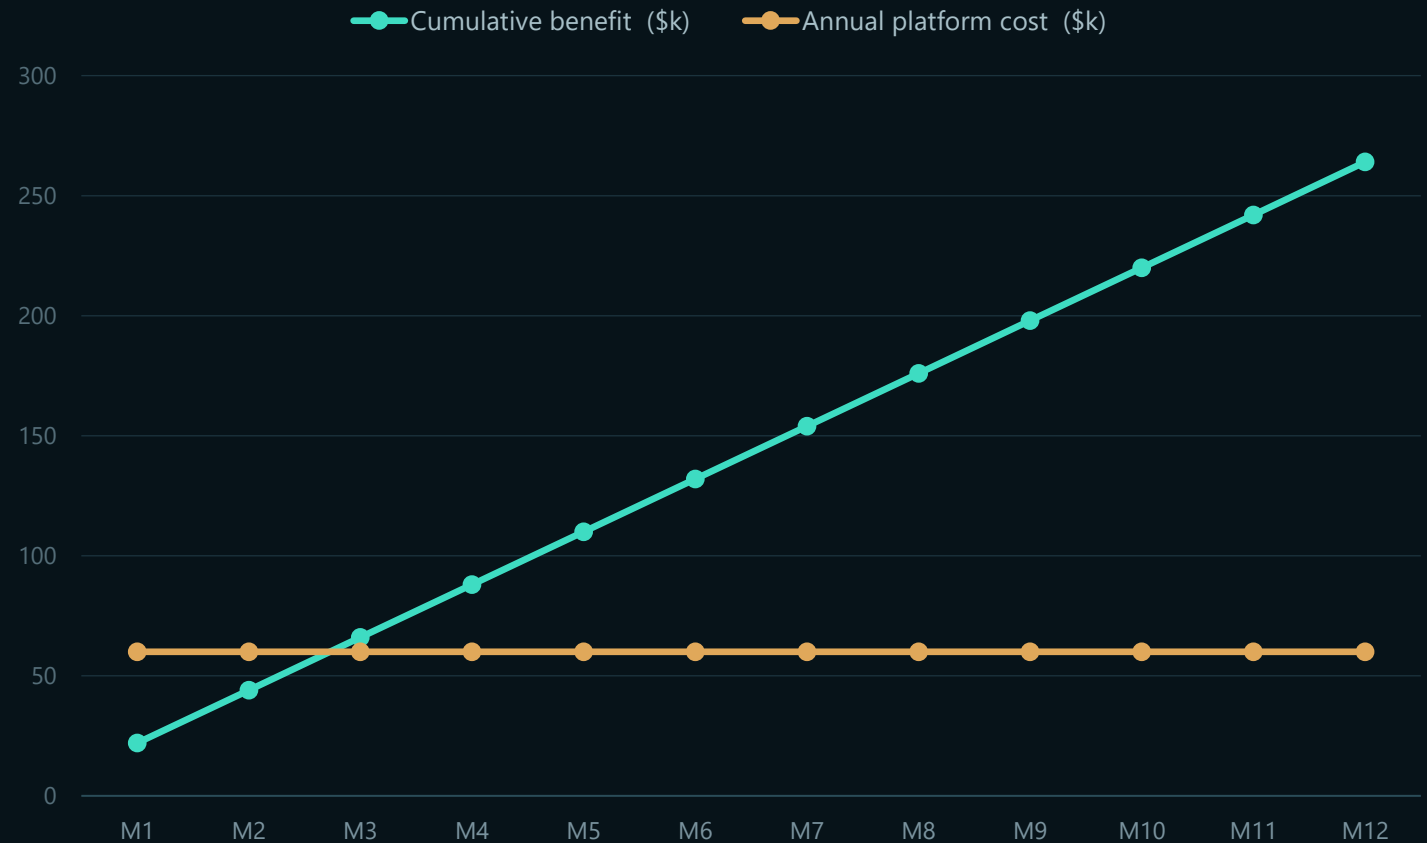

one 1% pricing error avoided on one \$8M job
is worth more than the licence

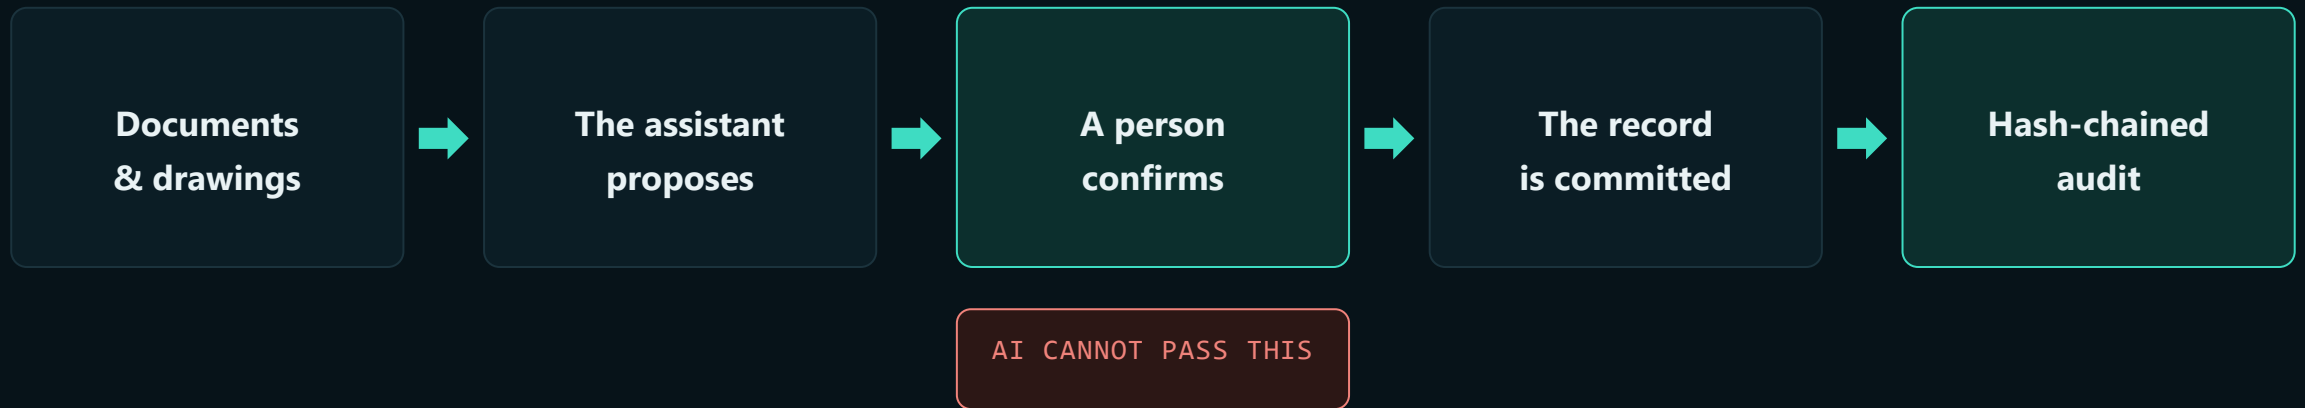

Under three months.

2.7 months

to cover a year of platform cost from estimating effort alone.

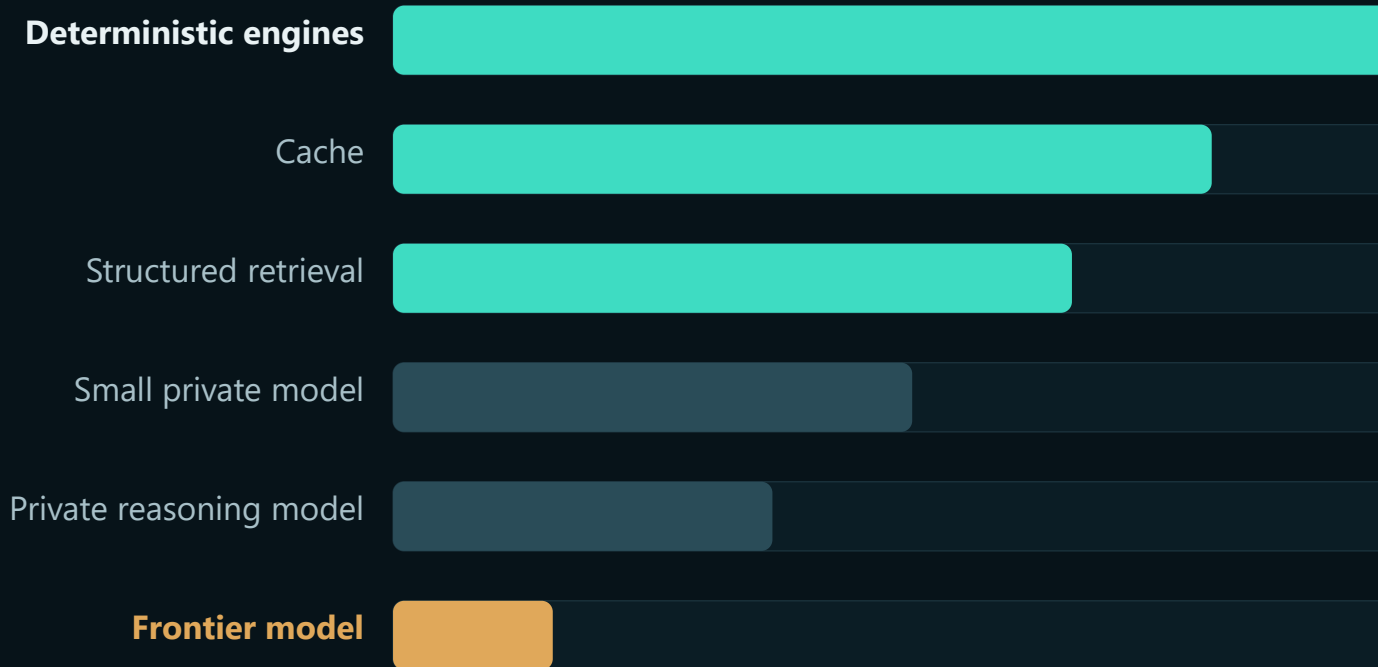

Levers 2 and 3 are not in this chart. Neither is a single won bid.

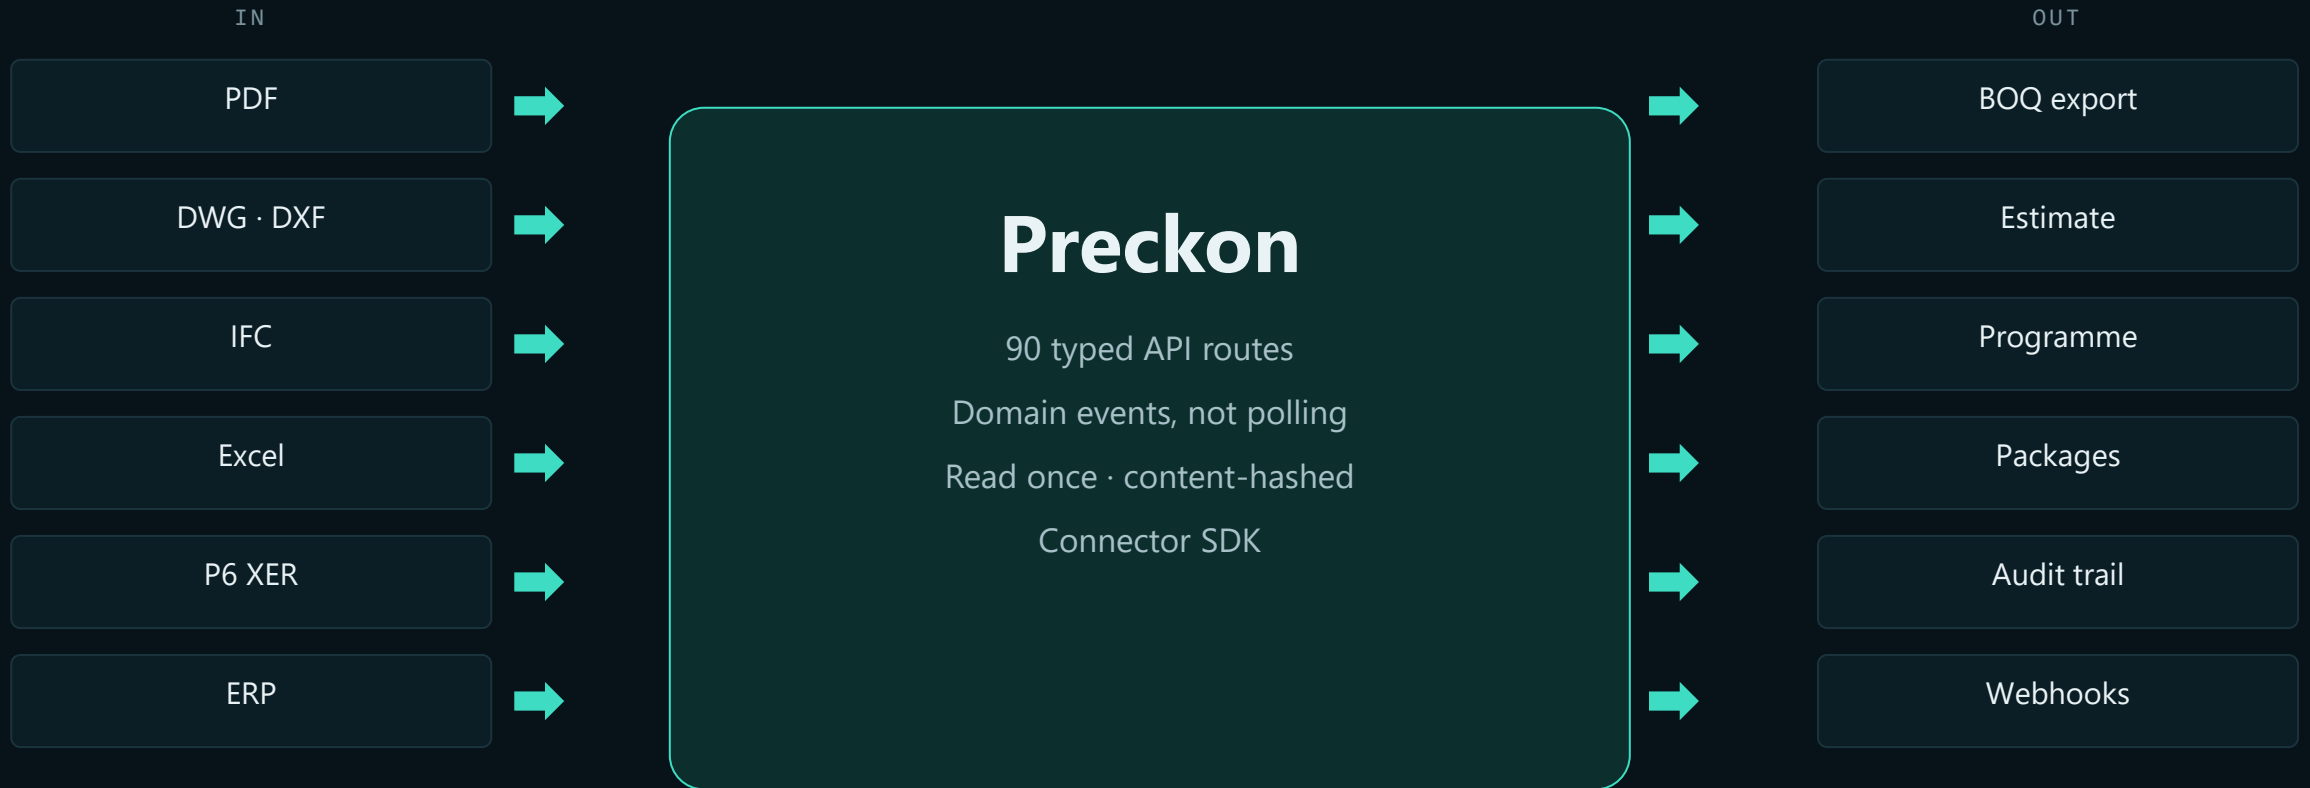

The assistant has four calls. None of them writes a business record.

A frontier model is the sixth thing we try.

ADRs

Not built yet: SSO · MFA · encryption at rest · CI · staging · tested restore

One bid. Six weeks.

01

A live tender

One project, one team, measured against a bid you have already priced

02

A golden set

One design set with its final priced bill — we test against it, in front of you

03

A security counterpart

Someone who closes the gap list with us in the same six weeks

Not asking for: a migration, anything switched off, or a decision today.

Every number can name where it came from.

That is the whole product. The rest is speed.
